President Message,

Thank you for taking this opportunity to learn about the Ideal Construction Design and Build Inc. Hopefully your review of our web site will provide a deeper understanding of our experience, organizational philosophy - as one team for Construction.

This success is linked by several factors including an ability to maintain long standing relationships with our clients and subcontractors, as well as the steadfast commitment of our employees to provide competitive project solutions. We are very proud of our personnel longevity and repeat business with our clients.

Our success also embraces the deep belief that we are only one part of a broader team effort where outcomes are directly the result of how well aligned expectations are with those of the client. At Ideal Construction Design and Build Inc., we place significant emphasis on assuring strong team alignment on each project we plan and build.

As the early decades of the 21st century unfold the construction industry will continue to experience a confluence of change, from the manner in which forms of information are managed and shared, to new and innovative ways of teaming, project delivery and financing...to continued acceleration in business opportunities and global competitive pressures. Increasingly success will be defined in terms of greater flexibility and the advancement of organizational culture and diversity, as well as excellence in sustainability, continuous training, and project safety.

We are optimistic about our times, the opportunities they will present, and the position of our organization...one team...poised to serve in a manner where owners receive the best long term value for their investment, and Ideal Construction Design and Build Inc., viewed as a long term partner within the community.

Best wishes,

Alia Nawaz, Business Owner, President, CEO
